Substance Storage Cabinets

## Key Features & Benefits

**Trafalgar** is a long established and privately owned Australian company whose name is synonymous with the supply of hazardous chemical storage cabinets. Trafalgar has been making safety cabinets for over 50 years and will continue to do so into the future. We are proud to be fighting hard to keep manufacturing alive in Australia and competing against cheap and inferior imported products. From our manufacturing plant in Sydney's west, Trafalgar's range of **Corrosive Substance Storage Cabinets** are all locally made, built in accordance with Australian Standards and come in a range of sizes. A full range of spare parts, including additional shelves and closing mechanisms are available.

### Corrosive Substance Storage Cabinets

**SUITABLE FOR SAFE STORAGE OF** corrosive substances that are listed as **Class 8** corrosive substances in the Australian Dangerous Goods code or that meet the classification in that code for corrosive substances.

All cabinets comply with **AS3780-2008** as follows:-

1. Each cabinet is marked with the name and address of the manufacturer.
2. The maximum storage capacity.
3. A Class 8 dangerous goods label with sides of a least 100mm nominal.

**Trafalgar has the expertise and capabilities to custom manufacture**

**safety cabinets.** Contact us to discuss your specific requirements.

## Substance Storage Cabinets

# Product Overview

Isocyanate free two-pack epoxy coating inside and out, providing a hardwearing finish.

Danger alert sign indicating specific hazardous substances stored in cabinets.

Ventilation port, measuring 55mm in diameter.

Fully welded 150mm deep liquid tight sump capable of containing at least 25% of the maximum storage capacity.

Internal shelf brackets that fully interlock with shelves.

1.1mm thick double skin wall construction, with 40mm air gap between walls to provide thermal insulation.

Ventilation port, measuring 55mm in diameter.

Continuous piano hinges ensuring smooth closure of door.

Full instructions on usage of the cabinet attached to the inside of the door.

Build in ground connector.

Round corners on door.

Fully adjustable galvanised shelves included, perforated for leakages and to permit free air flow. Easily replaced if damaged. Additional shelving available for purchase.

Recessed handle with key lock which can be opened from the inside, as per Australian Standards. Two keys supplied.

Concealed self-closing door mechanism for more durability and usable space. Patented self closing sequential door mechanism on double door cabinets allows for right door to stay open at 7 locking positions between 20 – 90° for easier loading and unloading.

Three point self latching door mechanism.
