

Dated: 1 November 2017

STATEMENT OF COMPLIANCE FOR PRATT EMERGENCY SAFETY SHOWER AND EYE WASHES.

This document is to advise that our Pratt brand, range of, emergency showers and eye washes are designed and manufactured to comply with Australian Standard AS 4775-2007.

This Standard provides the criteria for classification, installation, performance and maintenance for this type of emergency equipment.

Standards Australia or any other Government Authority, do not issue "Certificates of Compliance" to this Standard, for safety showers and eye washes as described. It is therefore the responsibility of the manufacturer or distributor of the products, to ensure they do comply to the requirements of the Standard.

Paramount Safety Products, the owners of the Pratt brand Emergency Showers and Eye Washes, have undertaken to ensure the design, operation, materials of construction and performance of this type of equipment complies with the specifications of the Standard.

There is also provision within the Standard for some products to be classified as Supplemental Equipment, such as Personal Wash Units and Drench Hoses which are acceptable to support plumbed and self-contained emergency equipment.

However, Paramount Safety Products is not responsible for the final selection, location, installation, and usage of the product.

Please refer to the above Standard for further details and information, or contact your local government authority or Paramount Safety Products.

Please also note that AS 4775 is similar to the ANSI Standard Z358.1 on which it was based. As such products complying to AS 4775 may also comply to Z358.1.

Yours sincerely

Clive Baker
Pratt Technical Manager
