

Store-Safe and EnviroSmart

– keeping you and the environment safe and protected.

Spill control in the workplace is essential. With rapid response, and the right spill control products on hand, potential site contamination, environmental damage and a threat to personal safety can be greatly minimised.

The new **Store-Safe** range of products by **EnviroSmart** offers a high level of spill protection in the workplace, or any location that stores or dispenses liquids that have a risk of spilling or overrun.

Environmentally friendly, the new **Store-Safe** range of products by **EnviroSmart**, features biologically active spill control products, stormwater protection and water treatment systems designed to exceed the latest regulatory demands placed on industry.

And like all **Store-Safe** products and services, the new range is backed by a national network of offices and agents – guaranteeing quick turnaround, supply and service.

Store-Safe and EnviroSmart – a better range, better service and a better price.

Bunding

A range of designs, sizes and configurations of bunding systems are available to provide spill containment where dangerous and hazardous chemicals and liquids are to be stored.

Drain Filter

The Drain Filter's unique design uses a polypropylene fabric and organic absorbent sock to capture contaminants whilst allowing water to flow through.

Spill Kits

A superior range of spill kits are available for:

- Oil & fuel
- General purpose
- Hazchem

Absorbents

Manufactured in Australia from a combination of organic cellulose products quickly absorbing a range of liquids including chemicals, oils, fuels, cooking oils, solvents, sewage and protein liquids.
